

EDI validation questions:

1. What Is the desired target solution?

2. If portals are used, which portal has your preference?

3. What message types (documents) need to be exchanged?

4. What format are you using (sample docs needed)?

5. Who are your technical resources (colleagues/our contact persons)?

6. Who is your EDI partner (Distrelec is working with Seeburger AG)

EDI validation questions:

Additional Notes -

If you run out of space, please reference the question number and continue your answers here.

API validation questions:

1. What functionality are you looking for the APIs to provide? (prices, stock enquiries, place orders, etc.)

2. What system/application will you be using internally to integrate with? (this could include custom systems, but we usually expect some type of ERP or similar system to be included somehow)

3. Do you already have similar API integrations with other vendors?

4. Do you have any documentation that we can share with our technical team to help them understand your API requirements?
